

BASKARAN R

Front End Developer

baskaranrajendran12@gmail.com | +919944743862 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) |

SUMMARY

Frontend Developer with 4+ years of experience building scalable, high-performance web applications. Specialized in React.js, Next.js, and modern JavaScript ecosystems, with strong expertise in UI/UX, SEO, performance optimization, and CMS-driven digital platforms. Experienced in architecting frontend solutions, integrating headless and traditional CMS platforms, and delivering enterprise-grade applications across global platforms. Proven ability to lead teams, drive frontend best practices, and leverage AI-assisted development tools to improve productivity and code quality.

KEY SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js, jQuery
- **Styling & UI:** Tailwind CSS, Bootstrap, Sass, SCSS
- **CMS & Backend Integration:** Strapi (Headless CMS), Joomla, WordPress, REST APIs, MySQL
- **Performance & SEO:** Core Web Vitals, Lighthouse, SEO Optimization, A/B Testing
- **Tools & Platforms:** Git, CI/CD Pipelines, Git-based workflows, JIRA, Tre lo, BrowserStack
- **AI Tools & Productivity:** ChatGPT, Claude, AI-assisted debugging
- **Analytics & UX Tools:** Google Analytics, Google Tag Manager, Heatmaps, PageSense
- **Design Tools:** Figma, Adobe Photoshop, Canva

WORK EXPERIENCE

Front-End Developer | PFEC Global India

February 2025 – Present

- Led end-to-end frontend development for 13+ country websites, 25+ campaign sites, and multiple product platforms across the full lifecycle.
- Architected a modern frontend stack using React.js, Next.js, and headless CMS (Strapi), enabling faster delivery and independent content management.
- Migrated legacy monolithic CMS to a decoupled headless architecture, improving content flexibility, build performance, and multi-region delivery.
- Improved website performance by 50% and reduced bounce rate by 40% through code splitting, lazy loading, and asset optimization.
- Increased user engagement by 20% across high-traffic platforms serving 100K+ monthly users through performance-first UI development.
- Implemented technical SEO — structured data, Core Web Vitals, and semantic markup — driving 30% growth in organic traffic.
- Built a design system and reusable component library across 13+ regional sites, reducing development effort by 15%.
- Collaborated with cross-functional teams (design, backend, SEO, marketing) to deliver responsive, cross-browser compatible interfaces with consistent UX.
- Streamlined build, testing, and deployments via CI/CD pipelines and Git workflows, reducing friction and release-related incidents.
- Defined frontend coding standards, component patterns, and best practices to improve maintainability and scalability.
- Mentored developers through code reviews and knowledge-sharing, improving overall team code quality and capability.

- Developed highly responsive, mobile-first web interfaces utilizing HTML5, CSS3, JavaScript, and modern frontend technologies.
- Partnered with product, design, and marketing managers to translate complex UI logic into stable frontend features aligned with user growth objectives.
- Validated analytics implementations using Chrome DevTools, browser network inspection, and JavaScript debugging to ensure clean and accurate data capture.
- Worked with JavaScript, HTML5, CSS3, and browser developer tools to troubleshoot frontend issues, validate tracking implementations, and improve website performance across multiple browsers.
- Maintained engineering source repositories utilizing strict Git and GitHub workflows within automated continuous integration pipelines.

Junior Web Developer | Eon8

Jan 2022 – Jan 2023

- Engineered responsive components and modular features utilizing JavaScript (ES6+), HTML5, and CSS3 across consumer-facing platforms.
- Utilized Git for version control and branch management, collaborating closely with junior engineers during sprint release cycles.
- Performed deep-dive debugging and frontend asset optimization protocols to boost search engine discoverability and system usability.

KEY PROJECTS

WordPress to React + Strapi Enterprise Migration

- Spearheaded the end-to-end decoupled architectural migration of 18 global country websites from legacy WordPress to a modern React.js + Strapi CMS stack.
- Designed a single, highly performant React component library featuring dynamic routing, localized rendering engines, and clean backend API integrations.
- Developed custom REST API frameworks to connect frontend components with Strapi CMS, allowing non-technical stakeholders to modify content independently.
- Achieved an 80% improvement in page load speeds globally by introducing code splitting, asset optimization, and aggressive lazy loading techniques.
- Mitigated risk during production rollouts by coordinating phased, zero-downtime deployments with thorough QA testing across all 18 production domains.

KEYWORDS

React.js, Next.js, JavaScript, TypeScript, Frontend Development, Web Performance, Headless CMS, CMS Integration, REST APIs, UI Development, AI-assisted Development, Claude AI, CI/CD Pipelines, Agile Delivery, Responsive Design, SEO

CORE COMPETENCIES

Frontend Architecture • Performance Optimization • CMS Integration • UI/UX Optimization • Team Leadership • AI-assisted Development • Agile Delivery • CI/CD Collaboration • SEO

AWARDS & RECOGNITION

- Spot Award for Tech Excellence | PFEC Global India (2025)
- Quarterly Performance Excellence Award | AECC India Pvt Ltd (2024)

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2015 – 2019
Periyar Maniammai University, Thanjavur
